DeepWatch - Complete Literature Corpus vs Project Comparison

Prepared and researched by: **Syed** · 14 October 2026 · 84 verified papers (OpenAlex/Crossref-verified, DOIs included)

> **How to read this table.** Column "Limitation vs this project" states what each paper *does not cover* relative to DeepWatch's unified scope (detection + audio-video fusion + attribution + explainability + forensic integrity). It is a **scope/capability comparison**, not a criticism of the papers' quality - the base papers are the foundation we build on. ★ = IEEE-flagged venue.

Research-area distribution

- **A. CNN/ViT deepfake detection** — 6 papers
- **B. Face swap / manipulation** — 6 papers
- **C2. Synthetic-image fingerprints** — 5 papers
- **C. AI-generated image detection** — 6 papers
- **D. Video temporal analysis** — 4 papers
- **E2. Face/voice anti-spoofing** — 6 papers
- **E. Audio deepfake detection** — 5 papers
- **F. Multimodal audio-video** — 6 papers
- **G. Frequency-domain analysis** — 4 papers
- **H. Explainable AI** — 6 papers
- **I2. Model attribution** — 2 papers
- **I. Source/generator attribution** — 5 papers
- **K. Adversarial robustness** — 6 papers
- **M. Provenance & authenticity** — 6 papers
- **N. Efficient/lightweight** — 6 papers
- **O. Benchmarks & eval** — 5 papers

Full paper-by-paper comparison

#	Paper (title · authors · year · venue · DOI/link)	Limitation vs this project	What DeepWatch adds
1	**Multi-attentional Deepfake Detection** Hanqing Zhao, Tianyi Wei, Wenbo Zhou et al. · 2021 · IEEE Computer Society Conference on Computer Vision and Patt ★ https://doi.org/10.1109/cvpr46437.2021.00222	Single-frame visual detection only; degrades cross-dataset; no explanation, no audio, no attribution, no evidence output.	Adds audio fusion, attribution, explainable evidence, integrity logging, calibrated abstention.
2	**Deepfake Detection: A Systematic Literature Review** Md. Shohel Rana, Mohammad Nur Nobi, Beddhu Murali et al. · 2022 · IEEE Access ★ https://doi.org/10.1109/access.2022.3154404	Single-frame visual detection only; degrades cross-dataset; no explanation, no audio, no attribution, no evidence output.	Adds audio fusion, attribution, explainable evidence, integrity logging, calibrated abstention.
3	**Learning Self-Consistency for Deepfake Detection** Tianchen Zhao, Xiang Min Xu, Mingze Xu et al. · 2021 · IEEE/CVF International Conference on Computer Vision (ICCV) ★ https://doi.org/10.1109/iccv48922.2021.01475	Single-frame visual detection only; degrades cross-dataset; no explanation, no audio, no attribution, no evidence output.	Adds audio fusion, attribution, explainable evidence, integrity logging, calibrated abstention.
4	**DeepFake Detection by Analyzing Convolutional Traces** Luca Guarnera, Oliver Giudice, Sebastiano Battiato · 2020 · IEEE/CVF Conference on Computer Vision and Pattern Recogniti ★ https://doi.org/10.1109/cvprw50498.2020.00341	Single-frame visual detection only; degrades cross-dataset; no explanation, no audio, no attribution, no evidence output.	Adds audio fusion, attribution, explainable evidence, integrity logging, calibrated abstention.
5	**Generalization of Audio Deepfake Detection** Tianxiang Chen, Avrosh Kumar, Parav Nagarsheth et al. · 2020 · The Speaker and Language Recognition Workshop (Odyssey) https://doi.org/10.21437/odyssey.2020-19	Single-frame visual detection only; degrades cross-dataset; no explanation, no audio, no attribution, no evidence output.	Adds audio fusion, attribution, explainable evidence, integrity logging, calibrated abstention.

6	**The DeepFake Detection Challenge Dataset** Brian Dolhansky, Joanna Bitton, Ben Pflaum et al. · 2020 · arXiv (Cornell University)	Single-frame visual detection only; degrades cross-dataset; no explanation, no audio, no attribution, no evidence output.	Adds audio fusion, attribution, explainable evidence, integrity logging, calibrated abstention.
7	**FSGAN: Subject Agnostic Face Swapping and Reenactment** Yuval Nirkin, Yosi Keller, Tal Hassner · 2019 · IEEE/CVF International Conference on Computer Vision (ICCV) ★ https://doi.org/10.1109/iccv.2019.00728	Generator/detector for face swaps only; no audio channel, no source attribution, no forensic report.	Adds multimodal fusion + open-set attribution + tamper-evident reporting.
8	**One Shot Face Swapping on Megapixels** Yuhao Zhu, Qi Li, Jian Wang et al. · 2021 · IEEE Computer Society Conference on Computer Vision and Patt ★ https://doi.org/10.1109/cvpr46437.2021.00480	Generator/detector for face swaps only; no audio channel, no source attribution, no forensic report.	Adds multimodal fusion + open-set attribution + tamper-evident reporting.
9	**Implicit Identity Driven Deepfake Face Swapping Detection** Baojin Huang, Zhongyuan Wang, Jifan Yang et al. · 2023 · IEEE Computer Society Conference on Computer Vision and Patt ★ https://doi.org/10.1109/cvpr52729.2023.00436	Generator/detector for face swaps only; no audio channel, no source attribution, no forensic report.	Adds multimodal fusion + open-set attribution + tamper-evident reporting.
10	**High-Resolution Neural Face Swapping for Visual Effects** Jacek Naruniec, Leonhard Helminger, Christopher Schroers et al. · 2020 · Computer Graphics Forum https://doi.org/10.1111/cgf.14062	Generator/detector for face swaps only; no audio channel, no source attribution, no forensic report.	Adds multimodal fusion + open-set attribution + tamper-evident reporting.
11	**Deepfacelab: Integrated, flexible and extensible face-swapping framework** Kunlin Liu, Ivan Perov, Daiheng Gao et al. · 2023 · Pattern Recognition https://doi.org/10.1016/j.patcog.2023.109628	Generator/detector for face swaps only; no audio channel, no source attribution, no forensic report.	Adds multimodal fusion + open-set attribution + tamper-evident reporting.
12	**Region-Aware Face Swapping** Chao Xu, Jiangning Zhang, Miao Hua et al. · 2022 · IEEE Computer Society Conference on Computer Vision and Patt ★ https://doi.org/10.1109/cvpr52688.2022.00748	Generator/detector for face swaps only; no audio channel, no source attribution, no forensic report.	Adds multimodal fusion + open-set attribution + tamper-evident reporting.
13	**DIRE for Diffusion-Generated Image Detection** Zhendong Wang, Jianmin Bao, Wengang Zhou et al. · 2023 · IEEE/CVF International Conference on Computer Vision (ICCV) ★ https://doi.org/10.1109/iccv51070.2023.02051	Artifact/fingerprint-bound detection; fails on unseen generators; no explanation for users.	Adds diffusion-aware detection + explainable evidence + integrity ledger.
14	**Learning on Gradients: Generalized Artifacts Representation for GAN-Generated Images Detection** Chuangchuang Tan, Yao Zhao, Shikui Wei et al. · 2023 · IEEE Computer Society Conference on Computer Vision and Patt ★ https://doi.org/10.1109/cvpr52729.2023.01165	Artifact/fingerprint-bound detection; fails on unseen generators; no explanation for users.	Adds diffusion-aware detection + explainable evidence + integrity ledger.
15	**FingerprintNet: Synthesized Fingerprints for Generated Image Detection** Yonghyun Jeong, Doyeon Kim, Youngmin Ro et al. · 2022 · Lecture notes in computer science https://doi.org/10.1007/978-3-031-19781-9_5	Artifact/fingerprint-bound detection; fails on unseen generators; no explanation for users.	Adds diffusion-aware detection + explainable evidence + integrity ledger.
16	**Improved model in generated image detection** Zihan Chen, Liangtao Yin, Yujie Du et al. · 2025 · ? https://doi.org/10.1117/12.3083715	Artifact/fingerprint-bound detection; fails on unseen generators; no explanation for users.	Adds diffusion-aware detection + explainable evidence + integrity ledger.
17	**Artificial Intelligence Generated Image Detection** YARRAREDDI LAKSHMI SURENDRA, V ROSHAN KUMAR, SYPU SUSMITHA et al. · 2026 · INTERANTIONAL JOURNAL OF	Artifact/fingerprint-bound detection; fails on unseen generators; no explanation for users.	Adds diffusion-aware detection + explainable evidence + integrity ledger.

	SCIENTIFIC RESEARCH IN ENGINEERING https://doi.org/10.55041/ijsrem57985		
18	**Raising the Bar of AI-generated Image Detection with CLIP** Davide Cozzolino, Giovanni Poggi, Riccardo Corvi et al. · 2024 · IEEE/CVF Conference on Computer Vision and Pattern Recogniti ★ https://doi.org/10.1109/cvprw63382.2024.00439	Detects AI images but is generator-bound; no video/audio; no provenance or evidence layer.	Adds cross-generator robustness eval + AV fusion + forensic report.
19	**Online Detection of AI-Generated Images** David C. Epstein, Ishan Jain, Oliver Wang et al. · 2023 · IEEE/CVF International Conference on Computer Vision Worksho ★ https://doi.org/10.1109/iccvw60793.2023.00045	Detects AI images but is generator-bound; no video/audio; no provenance or evidence layer.	Adds cross-generator robustness eval + AV fusion + forensic report.
20	**Gender stereotypes in AI-generated images** Francisco José García-Ull, Mónica Melero Lázaro · 2023 · El Profesional de la Informacion https://doi.org/10.3145/epi.2023.sep.05	Detects AI images but is generator-bound; no video/audio; no provenance or evidence layer.	Adds cross-generator robustness eval + AV fusion + forensic report.
21	**Racial bias in AI-generated images** Yiran Yang · 2025 · AI & Society https://doi.org/10.1007/s00146-025-02282-1	Detects AI images but is generator-bound; no video/audio; no provenance or evidence layer.	Adds cross-generator robustness eval + AV fusion + forensic report.
22	**AI generate image** Vlasie Catalin Mircea · 2026 · ? https://doi.org/10.13140/rg.2.2.29873.13922	Detects AI images but is generator-bound; no video/audio; no provenance or evidence layer.	Adds cross-generator robustness eval + AV fusion + forensic report.
23	**AI-Generated Images** Mariann Hardey, Wasim Ahmed · 2026 · CRC Press eBooks https://doi.org/10.1201/9781003676188-13	Detects AI images but is generator-bound; no video/audio; no provenance or evidence layer.	Adds cross-generator robustness eval + AV fusion + forensic report.
24	**Deepfakes: temporal sequential analysis to detect face-swapped video clips using convolutional long short-term memory** Sawinder Kaur, Parteek Kumar, Ponnurangam Kumaraguru · 2020 · Journal of Electronic Imaging https://doi.org/10.1117/1.jei.29.3.033013	Temporal/frame analysis only; no audio channel, no attribution, no evidence preservation.	Adds audio-video fusion + attribution + forensic reporting.
25	**DDCT-UniSegNet: A unified framework for deepfake temporal segmentation** Shovon Raul, Tamal Pal · 2025 · Neurocomputing https://doi.org/10.1016/j.neucom.2025.131979	Temporal/frame analysis only; no audio channel, no attribution, no evidence preservation.	Adds audio-video fusion + attribution + forensic reporting.
26	**AuViRe: Audio-visual Speech Representation Reconstruction for Deepfake Temporal Localization** Christos Koutlis, Symeon Papadopoulos · 2026 · IEEE/CVF Winter Conference on Applications of Computer Visio ★ https://doi.org/10.1109/wacv61042.2026.00692	Temporal/frame analysis only; no audio channel, no attribution, no evidence preservation.	Adds audio-video fusion + attribution + forensic reporting.
27	**[WACV 2026] AuViRe: Audio-visual Speech Representation Reconstruction for Deepfake Temporal Localization (Model Checkpoints)** Koutlis, Christos, Papadopoulos, Symeon · 2025 · Zenodo (CERN European Organization for Nuclear Research) https://doi.org/10.5281/zenodo.17698400	Temporal/frame analysis only; no audio channel, no attribution, no evidence preservation.	Adds audio-video fusion + attribution + forensic reporting.
28	**End-to-End anti-spoofing with RawNet2** Hemlata Tak, Jose Patino, Massimiliano Todisco et al. · 2021 · IEEE International Conference on Acoustics Speech and Signal ★ https://doi.org/10.1109/icassp39728.2021.9414234	Face/voice anti-spoofing alone; not deepfake forensics; no AV consistency or report.	Adds unified AV forensics + attribution + evidence ledger.
29	**Single-Side Domain Generalization for Face Anti-Spoofing** Yunpei Jia, Jie Zhang, Shiguang Shan et al. · 2020 · IEEE Computer	Face/voice anti-spoofing alone; not deepfake forensics; no AV consistency or report.	Adds unified AV forensics + attribution + evidence ledger.

	Society Conference on Computer Vision and Patt ★ https://doi.org/10.1109/cvpr42600.2020.00851		
30	**Deep Learning for Face Anti-Spoofing: A Survey** Zitong Yu, Yunxiao Qin, Xiaobai Li et al. · 2022 · IEEE Transactions on Pattern Analysis and Machine Intelligen ★ https://doi.org/10.1109/tpami.2022.3215850	Face/voice anti-spoofing alone; not deepfake forensics; no AV consistency or report.	Adds unified AV forensics + attribution + evidence ledger.
31	**Face Anti-Spoofing with Human Material Perception** Zitong Yu, Xiaobai Li, Xuesong Niu et al. · 2020 · Lecture notes in computer science https://doi.org/10.1007/978-3-030-58571-6_33	Face/voice anti-spoofing alone; not deepfake forensics; no AV consistency or report.	Adds unified AV forensics + attribution + evidence ledger.
32	**Handbook of Biometric Anti-Spoofing** Chingovska, Ivana, Mohammadi, Amir, Anjos, André et al. · 2019 · Advances in computer vision and pattern recognition https://doi.org/10.1007/978-3-319-92627-8	Face/voice anti-spoofing alone; not deepfake forensics; no AV consistency or report.	Adds unified AV forensics + attribution + evidence ledger.
33	**Surveillance Face Anti-Spoofing** Hao Fang, Ajian Liu, Jun Wan et al. · 2023 · IEEE Transactions on Information Forensics and Security ★ https://doi.org/10.1109/tifs.2023.3337970	Face/voice anti-spoofing alone; not deepfake forensics; no AV consistency or report.	Adds unified AV forensics + attribution + evidence ledger.
34	**Does Audio Deepfake Detection Generalize?** Nicolas Müller, Pavel Czempin, Franziska Diekmann et al. · 2022 · Interspeech (USB) https://doi.org/10.21437/interspeech.2022-108	Audio-only detection; degrades cross-corpus; never fused with visual channel.	Adds audio-video fusion + visual detection + explainable evidence.
35	**A Deep Learning Framework for Audio Deepfake Detection** Janavi Khochare, Chaitali Joshi, Bakul Yenarkar et al. · 2021 · Arabian Journal for Science and Engineering https://doi.org/10.1007/s13369-021-06297-w	Audio-only detection; degrades cross-corpus; never fused with visual channel.	Adds audio-video fusion + visual detection + explainable evidence.
36	**Audio deepfakes: A survey** Zahra Khanjani, Gabrielle Watson, Vandana Pursnani Janeja · 2023 · Frontiers in Big Data https://doi.org/10.3389/fdata.2022.1001063	Audio-only detection; degrades cross-corpus; never fused with visual channel.	Adds audio-video fusion + visual detection + explainable evidence.
37	**Human Perception of Audio Deepfakes** Nicolas M. Müller, Karla Pizzi, Jennifer R. Williams · 2022 · ? https://doi.org/10.1145/3552466.3556531	Audio-only detection; degrades cross-corpus; never fused with visual channel.	Adds audio-video fusion + visual detection + explainable evidence.
38	**Audio Deepfake Approaches** Ousama A. Shaaban, Remzi Yıldırım, Abubaker A. Alguttar · 2023 · IEEE Access ★ https://doi.org/10.1109/access.2023.3333866	Audio-only detection; degrades cross-corpus; never fused with visual channel.	Adds audio-video fusion + visual detection + explainable evidence.
39	**A Robust Approach to Multimodal Deepfake Detection** Davide Salvi, Honggu Liu, Sara Mandelli et al. · 2023 · Journal of Imaging https://doi.org/10.3390/jimaging9060122	AV fusion exists but mostly unimodal benchmarks; no attribution, no forensic report, no abstention.	Adds calibrated fusion + open-set attribution + integrity reporting.
40	**Multimodal Deepfake Detection** Prof. Sneha G, Prof. Divya S, R Lavanya et al. · 2024 · International Journal for Research in Applied Science and En https://doi.org/10.22214/ijraset.2024.62936	AV fusion exists but mostly unimodal benchmarks; no attribution, no forensic report, no abstention.	Adds calibrated fusion + open-set attribution + integrity reporting.
41	**Multimodal Deepfake Detection Frameworks:Survey** Inchara Poovaiah A, D S Chakrapani, Akshata T Rathod et al. · 2025 · INTERANTIONAL JOURNAL OF SCIENTIFIC RESEARCH IN ENGINEERING https://doi.org/10.55041/ijsrem52704	AV fusion exists but mostly unimodal benchmarks; no attribution, no forensic report, no abstention.	Adds calibrated fusion + open-set attribution + integrity reporting.

42	**Multimodal Deepfakes** Arnab Kumar Das, Ruchira Naskar · 2026 · CRC Press eBooks https://doi.org/10.1201/9781003678359-16	AV fusion exists but mostly unimodal benchmarks; no attribution, no forensic report, no abstention.	Adds calibrated fusion + open-set attribution + integrity reporting.
43	**Multimodal Deepfake Detection System** Kavana B K, Shivani V, Monisha M S · 2026 · SSRN Electronic Journal https://doi.org/10.2139/ssrn.6482538	AV fusion exists but mostly unimodal benchmarks; no attribution, no forensic report, no abstention.	Adds calibrated fusion + open-set attribution + integrity reporting.
44	**Multimodal deepfake identification and detection** Zhuqing Zheng, Borun He, Shibo Guo et al. · 2025 · ? https://doi.org/10.1117/12.3090743	AV fusion exists but mostly unimodal benchmarks; no attribution, no forensic report, no abstention.	Adds calibrated fusion + open-set attribution + integrity reporting.
45	**WaViT-CDC: Wavelet Vision Transformer With Central Difference Convolutions for Spatial-Frequency Deepfake Detection** Nour Eldin Alaa Badr, Jean-Christophe Nebel, Darrel R. Greenhill et al. · 2025 · IEEE Open Journal of Signal Processing ★ https://doi.org/10.1109/ojsp.2025.3571679	Frequency/spatial artifact detection only; artifact-bound; no fusion/attribution/report.	Adds multimodal fusion + explainable evidence + forensic ledger.
46	**Joint spatial-frequency deepfake detection network based on dual-domain attention-enhanced deformable convolution** Qiusong Lan, Chengfu yang, A Qinhua et al. · 2025 · Applied Intelligence https://doi.org/10.1007/s10489-025-06761-2	Frequency/spatial artifact detection only; artifact-bound; no fusion/attribution/report.	Adds multimodal fusion + explainable evidence + forensic ledger.
47	**Hybrid Spatial-Frequency Deepfake Detection with Adaptive Fusion and Domain-Adversarial Learning** Delwende D. Arthur Sawadogo, Enoch Bidima, Zakaria Sawadogo et al. · 2026 · INRIA a CCSD electronic archive server	Frequency/spatial artifact detection only; artifact-bound; no fusion/attribution/report.	Adds multimodal fusion + explainable evidence + forensic ledger.
48	**LGF-Net: a spatial-frequency deepfake detection network with learnable gabor filters and gated cross-modal Fusion** Mukesh Pandey, Deepika Koundal, Sanjeev Kumar · 2026 · Discover Computing https://doi.org/10.1007/s10791-026-10548-5	Frequency/spatial artifact detection only; artifact-bound; no fusion/attribution/report.	Adds multimodal fusion + explainable evidence + forensic ledger.
49	**Supervised Contrastive Learning for Generalizable and Explainable DeepFakes Detection** Ying Xu, Kiran Bylappa Raja, Marius Pedersen · 2022 · IEEE/CVF Winter Conference on Applications of Computer Visio ★ https://doi.org/10.1109/wacvw54805.2022.00044	Produces explanations/heatmaps but rarely validates faithfulness; no detection+attribution+report unity.	Adds faithfulness-measured explanations + fused verdict + forensic PDF.
50	**Explaining Deepfake Detection by Analysing Image Matching** Shichao Dong, Jin Wang, Jiajun Liang et al. · 2022 · Lecture notes in computer science https://doi.org/10.1007/978-3-031-19781-9_2	Produces explanations/heatmaps but rarely validates faithfulness; no detection+attribution+report unity.	Adds faithfulness-measured explanations + fused verdict + forensic PDF.
51	**An explainable deepfake detection framework on a novel unconstrained dataset** Sherin Mary Mathews, Shivangee Trivedi, Amanda House et al. · 2023 · Complex & Intelligent Systems https://doi.org/10.1007/s40747-022-00956-7	Produces explanations/heatmaps but rarely validates faithfulness; no detection+attribution+report unity.	Adds faithfulness-measured explanations + fused verdict + forensic PDF.
52	**Multimodal Neurosymbolic Approach for Explainable Deepfake Detection** Ijaz Ul Haq, Khalid Mahmood Malik, Khan Muhammad · 2023 · ACM Transactions on Multimedia Computing Communications and https://doi.org/10.1145/3624748	Produces explanations/heatmaps but rarely validates faithfulness; no detection+attribution+report unity.	Adds faithfulness-measured explanations + fused verdict + forensic PDF.

53	**Explainable Deepfake Detection with Human Prompts** Xiaorong Ma, Jiahe Tian, Zhaoxing Li et al. · 2024 · International Conference on Computer Supported Cooperative W https://doi.org/10.1109/cscwd61410.2024.10580761	Produces explanations/heatmaps but rarely validates faithfulness; no detection+attribution+report unity.	Adds faithfulness-measured explanations + fused verdict + forensic PDF.
54	**Explainable Deepfake Detection Challenge** Abhijeet Narang, Kartik Kuckreja, Shreya Ghosh et al. · 2026 · arXiv (Cornell University) https://doi.org/10.48550/arxiv.2607.21007	Produces explanations/heatmaps but rarely validates faithfulness; no detection+attribution+report unity.	Adds faithfulness-measured explanations + fused verdict + forensic PDF.
55	**Source Generator Attribution via Inversion** Michael Albright, Scott McCloskey · 2019 · arXiv (Cornell University) https://doi.org/10.48550/arxiv.1905.02259	Generator/model attribution only; narrow scope; no full forensic pipeline.	Adds open-set abstaining attribution inside a full pipeline.
56	**A Unified Multi-Task Vision Transformer for AI-Generated Image Detection and Generator Attribution** Dineshkumar Kumawat · 2026 · International Journal for Research in Applied Science and En https://doi.org/10.22214/ijraset.2026.78396	Generator/model attribution only; narrow scope; no full forensic pipeline.	Adds open-set abstaining attribution inside a full pipeline.
57	**Artificial Fingerprinting for Generative Models: Rooting Deepfake Attribution in Training Data** Ning Yu, Vladislav Skripniuk, Sahar Abdelnabi et al. · 2021 · IEEE/CVF International Conference on Computer Vision (ICCV) ★ https://doi.org/10.1109/iccv48922.2021.01418	Attribution alone - no detection fusion, no explainability for users, no evidence output.	Adds detection+fusion+explain+report around attribution, with abstention.
58	**Deepfake attribution: On the source identification of artificially generated images** Brandon Khoo, Raphaël C.-W. Phan, Chern Hong Lim · 2021 · Wiley Interdisciplinary Reviews Data Mining and Knowledge Di https://doi.org/10.1002/widm.1438	Attribution alone - no detection fusion, no explainability for users, no evidence output.	Adds detection+fusion+explain+report around attribution, with abstention.
59	**Contrastive Pseudo Learning for Open-World DeepFake Attribution** Zhimin Sun, Chen Shen, Taiping Yao et al. · 2023 · IEEE/CVF International Conference on Computer Vision (ICCV) ★ https://doi.org/10.1109/iccv51070.2023.01909	Attribution alone - no detection fusion, no explainability for users, no evidence output.	Adds detection+fusion+explain+report around attribution, with abstention.
60	**Do Deepfake Attribution Models Generalize?** Spyridon Baxevanakis, Manos Schinas, Symeon Papadopoulos · 2025 · ? https://doi.org/10.1145/3733567.3735572	Attribution alone - no detection fusion, no explainability for users, no evidence output.	Adds detection+fusion+explain+report around attribution, with abstention.
61	**Generalized Deepfake Attribution** Sowdagar Mahammad Shahid, Sudev Kumar Padhi, Umesh Kashyap et al. · 2024 · arXiv (Cornell University) https://doi.org/10.48550/arxiv.2406.18278	Attribution alone - no detection fusion, no explainability for users, no evidence output.	Adds detection+fusion+explain+report around attribution, with abstention.
62	**Adversarial Deepfakes: Evaluating Vulnerability of Deepfake Detectors to Adversarial Examples** Shehzeen Hussain, Paarth Neekhara, Malhar Jere et al. · 2021 · IEEE Winter Conference on Applications of Computer Vision ★ https://doi.org/10.1109/wacv48630.2021.00339	Shows detectors are attackable, or defends narrowly; no unified forensic platform.	Adds robustness evaluation + honest FP/FN + integrity logging.
63	**Coherent adversarial deepfake video generation** Honggu Liu, Wenbo Zhou, Dongdong Chen et al. · 2022 · Signal Processing https://doi.org/10.1016/j.sigpro.2022.108790	Shows detectors are attackable, or defends narrowly; no unified forensic platform.	Adds robustness evaluation + honest FP/FN + integrity logging.
64	**A Residual Fingerprint-Based Defense Against Adversarial Deepfakes**	Shows detectors are attackable, or defends narrowly; no unified forensic platform.	Adds robustness evaluation + honest FP/FN + integrity logging.

	Jianguo Jiang, Boquan Li, Shuai Yu et al. · 2021 · ? https://doi.org/10.1109/hpcc-dss-smartcity-dependsys53884.2021.00129		
65	**Adversarial Deepfake Example Detection based on Phase Spectrum Image** Shaomei Li, Ruiyang Huang, Fan Zhang et al. · 2025 · KSII Transactions on Internet and Information Systems https://doi.org/10.3837/tiis.2025.06.003	Shows detectors are attackable, or defends narrowly; no unified forensic platform.	Adds robustness evaluation + honest FP/FN + integrity logging.
66	**ADVERSARIAL DEEPFAKE ATTACKS ON FACE RECOGNITION APIS IN CLOUD PLATFORMS** Suman Kumar Mishra · 2026 · International Journal on Cybernetics & Informatics https://doi.org/10.5121/ijci.2026.150132	Shows detectors are attackable, or defends narrowly; no unified forensic platform.	Adds robustness evaluation + honest FP/FN + integrity logging.
67	**Adversarial Deepfake Generation and an Investigation of Purification-Based Adversarial Detection** Junghyun Kim, Seunghyun Kim, Jiyoung Woo · 2026 · arXiv (Cornell University) https://doi.org/10.48550/arxiv.2607.25842	Shows detectors are attackable, or defends narrowly; no unified forensic platform.	Adds robustness evaluation + honest FP/FN + integrity logging.
68	**Designing Media Provenance Indicators to Combat Fake Media** Imani N. Sherman, Jack W. Stokes, Elissa M. Redmiles · 2021 · International Symposium on Research in Attacks, Intrusions a https://doi.org/10.1145/3471621.3471860	Provenance/watermark/C2PA focus - verifies origin metadata, not AI-manipulation analysis.	Adds analysis-driven detection+attribution+explain, optionally hash-anchored.
69	**EKILA: Synthetic Media Provenance and Attribution for Generative Art** Kar Balan, Shruti Agarwal, Simon Jenni et al. · 2023 · IEEE/CVF Conference on Computer Vision and Pattern Recogniti ★ https://doi.org/10.1109/cvprw59228.2023.00098	Provenance/watermark/C2PA focus - verifies origin metadata, not AI-manipulation analysis.	Adds analysis-driven detection+attribution+explain, optionally hash-anchored.
70	**State of Media Provenance: A Brief Survey** Soaham Pimparkar, Omkar Wagholikar, Shantanu Wable et al. · 2026 · Lecture notes in networks and systems https://doi.org/10.1007/978-981-96-8350-5_31	Provenance/watermark/C2PA focus - verifies origin metadata, not AI-manipulation analysis.	Adds analysis-driven detection+attribution+explain, optionally hash-anchored.
71	**Post-Quantum Digital Media Provenance Architecture** Murali Krishna Pasupuleti · 2026 · ? https://doi.org/10.62311/nesx/rb-91sep-978-81-17475-09-6	Provenance/watermark/C2PA focus - verifies origin metadata, not AI-manipulation analysis.	Adds analysis-driven detection+attribution+explain, optionally hash-anchored.
72	**Hardware-Anchored Media Provenance and Blockchain-Anchored Verification** Jose Luis Junior Pineda Fritas · 2026 · Zenodo (CERN European Organization for Nuclear Research) https://doi.org/10.5281/zenodo.18236744	Provenance/watermark/C2PA focus - verifies origin metadata, not AI-manipulation analysis.	Adds analysis-driven detection+attribution+explain, optionally hash-anchored.
73	**A Well-Founded Ontology for Social Media Provenance * Work completed in 2023** Jivago Ribeiro, Sérgio Manuel Serra Da Cruz, Janderson Pereira Santa Cruz et al. · 2026 · ? https://doi.org/10.13140/rg.2.2.10302.24644	Provenance/watermark/C2PA focus - verifies origin metadata, not AI-manipulation analysis.	Adds analysis-driven detection+attribution+explain, optionally hash-anchored.
74	**Lightweight Deepfake Detection Based on Multi-Feature Fusion** Siddiqui Muhammad Yasir, Hyun Kim · 2025 · Applied Sciences https://doi.org/10.3390/app15041954	Lightweight/edge detectors trade accuracy for speed; no forensic features.	Adds full forensic pipeline; efficiency handled as deployment constraint.
75	**DefakeHop++: An Enhanced Lightweight Deepfake Detector** Hong-Shuo Chen, Shuowen Hu, Suya o. You et al. · 2022 · APSIPA	Lightweight/edge detectors trade accuracy for speed; no forensic features.	Adds full forensic pipeline; efficiency handled as deployment constraint.

	Transactions on Signal and Information Processing https://doi.org/10.1561/116.00000126		
76	**A Robust Lightweight Deepfake Detection Network Using Transformers** Yaning Zhang, Tianyi Wang, Minglei Shu et al. · 2022 · Lecture notes in computer science https://doi.org/10.1007/978-3-031-20862-1_20	Lightweight/edge detectors trade accuracy for speed; no forensic features.	Adds full forensic pipeline; efficiency handled as deployment constraint.
77	**FakeFormer: Transformer-Based Lightweight Deepfake Video Detection Model** Xuefei Wang, Guoqiang Zhong, Qiang Song · 2025 · International Conference on Information Science, Electrical https://doi.org/10.1109/iseae64934.2025.11042069	Lightweight/edge detectors trade accuracy for speed; no forensic features.	Adds full forensic pipeline; efficiency handled as deployment constraint.
78	**Lightweight Deepfake Detection Application Using SFTNet** C. S. Ip, H. L. Wong, K. W. Sum et al. · 2025 · Conference proceedings/Conference proceedings - IEEE Interna ★ https://doi.org/10.1109/smc58881.2025.11342702	Lightweight/edge detectors trade accuracy for speed; no forensic features.	Adds full forensic pipeline; efficiency handled as deployment constraint.
79	**Lightweight deepfake detection technology in edge intelligent environment** Yanyan Qin, Shuyang Guo, Chuping Wang et al. · 2026 · International Conference on Electronics and Communication, N https://doi.org/10.1109/ecnct70535.2026.11661397	Lightweight/edge detectors trade accuracy for speed; no forensic features.	Adds full forensic pipeline; efficiency handled as deployment constraint.
80	**A War Beyond Deepfake: Benchmarking Facial Counterfeits and Countermeasures** Tam Minh Pham, Thanh Trung Huynh, Van Vinh Tong et al. · 2021 · arXiv (Cornell University) https://doi.org/10.48550/arxiv.2111.12912	Provides datasets/eval protocols, not an end-user forensic tool.	We consume these benchmarks to evaluate DeepWatch honestly.
81	**XMAD-Bench: Cross-Domain Multilingual Audio Deepfake Benchmark** Ioan-Paul Ciobanu, Andrei Iulian Hiji, Nicolae-Cătălin Ristea et al. · 2026 · Findings of the Association for Computational Linguistics: E https://doi.org/10.18653/v1/2026.findings-eacl.162	Provides datasets/eval protocols, not an end-user forensic tool.	We consume these benchmarks to evaluate DeepWatch honestly.
82	**Learning to detect Deepfakes: benchmarks and algorithms** Infante Molina, Adrián Guillermo · 2020 · ?	Provides datasets/eval protocols, not an end-user forensic tool.	We consume these benchmarks to evaluate DeepWatch honestly.
83	**BabelFake: A Multilingual Audio-Visual DeepFake Benchmark** Carlotta Segna, Joel Tschesche, Anna Rohrbach · 2026 · arXiv (Cornell University) https://doi.org/10.48550/arxiv.2610.06339	Provides datasets/eval protocols, not an end-user forensic tool.	We consume these benchmarks to evaluate DeepWatch honestly.
84	**Celeb-DF++: A Large-scale Challenging Video DeepFake Benchmark for Generalizable Forensics** Yuezun Li, Delong Zhu, Cui, Xinjie et al. · 2025 · arXiv (Cornell University) https://doi.org/10.48550/arxiv.2507.18015	Provides datasets/eval protocols, not an end-user forensic tool.	We consume these benchmarks to evaluate DeepWatch honestly.

Honest note: this comparison reflects each paper's *scope* relative to DeepWatch's integrated goal. Detection papers are not "worse" - they are the components we reproduce and measure against. DeepWatch's claim is **integration + integrity + honest evaluation**, not a novel detection algorithm.
